### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 47 and 54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

"preferably" on 5 of claim 47 should be removed.

On line 5 of claim 54, "defined in claim 22" is indefinite since claim 22 is a canceled claim.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Page 3

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 31, 35, 36, 43-51, and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Block et al (3,231,517).

Block et al disclose a process of alkylating isoparaffins or aromatic hydrocarbons with olefin and hydrogen halide such as hydrogen chloride in the presence of solid acidic catalyst which has been contacted with a stream of inert gas such as air, nitrogen, hydrogen or hydrogen chloride during the calcination of the catalyst prior to the alkylation reaction (col. 1, lines 12-20 and 52-56; col. 2, lines 24-59; col. 3, lines 1-25; col. 8, lines 49-60).

Block does not disclose specifically pick hydrogen chloride from others including air, nitrogen, and hydrogen. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Block process by using the hydrogen chloride from three others to arrive at the claimed process since it is expected that using any from these four components would yield similar results.

It appears that Block does not disclose the number of carbons of the reactants. However, it would have been obvious to one having ordinary skill in the art at the time the invention was

made to have modified the Block process by using an isoparaffin of C4-6 or benzene and a monoolefin of C3-6 as reactants since it is expected that any isoparaffin or aromatic hydrocarbon and any olefin can be used for the Block alkylation process.

Page 4

Block does not disclose the condition of the alkylation such as temperature, pressure, WHSV, concentration of hydrogen halide. However, these factors would be selected to operate the process and one having ordinary skill in the art would select appropriate conditions including these recited in the claims to arrive at the applicants' claimed process since it is expected that no unexpected results would be obtained when these parameters are selected.

The catalysts as called for in claim 50 and 51 can be found on column 2, lines 24-58 and col. 3, lines 1-45.

### Allowable Subject Matter

Claims 32-34, 37-42, 52, and 53 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to THUAN D. DANG whose telephone number is (571)272-1445. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
